

## **South Australian Hydrogen Hubs Incorporated** **Appoints New Leadership**

South Australian Hydrogen Hubs Incorporated (SA-H2H™) is delighted to announce a series of milestone changes to our leadership group, who are charged with growing our impact to the next level.

Our first ever Board elections were held at our recent Annual General Meeting, resulting in the following appointments to the Board:

Kristin Raman, *Australian Gas Infrastructure Group (AGIG)*  
Russell James, *ATCO Australia*  
Dana Spiers, *BOC Limited*  
Timothy Swaine, *Finlaysons Lawyers*  
Hilary Newstead, *GFG Alliance*  
Nicholas Mumford, *Mumford Commercial Consulting*  
Jorge Martin Gistau, *Ricardo Australia*  
Simon White, *Waternish Engineering*

Our thanks to Chris Dolman of BOC Limited, who stepped down from the Board at the AGM, and Quentin Roberts of EfficientSee who retired from the Board at the end of June.

We are also delighted to announce that at the first Board Meeting of the new Board held last week, Russell James, Director Clean Fuels Industry Development of ATCO Australia, was appointed Chair, replacing our inaugural Chair, Graham Dooley. Graham's commitment to SA-H2H™ is testament to his dedication and we are pleased that he remains involved in our work as an ongoing member through his firm 1414 Degrees Limited. We are pleased to announce that also at this meeting, Nicholas Mumford was appointed as Deputy Chair.

From the founding of SA-H2H™ in 2021, Nicholas Mumford and Quentin Roberts have been dedicated to building an organisation that can sustainably support development of a hydrogen ecosystem in South Australia. Once Quentin stepped away from being co-CEO earlier this year, Nicholas has been the mainstay, guiding us to where we are today. It is a significant milestone that as a result of recruiting a new CEO, both Nicholas and Quentin have been able to step back from their foreground role as co-CEOs to remain active players in the hydrogen ecosystem moving forward.

We are very pleased to announce that Lauran Huefner joined us as CEO from 2 December. Lauran has significant experience in industry and professional bodies, across the medical, public transport and engineering sectors, as well as time in universities. He is particularly passionate about innovation and the derived economic benefits from its implementation, and is excited by the prospect of supporting a new technology ecosystem develop and grow in South Australia. He particularly looks forward to supporting the growth of H2GP, as well as our existing projects aimed to support the decarbonisation of mobility. He looks forward to meeting all stakeholders in the hydrogen ecosystem over the coming months.
